Welcome

This PDF is shown by the pdfviewer component of PBToolboxAI.
It is a local file : doc\sample-local-pdf.pdf, next to the application.
Use the reader’s own toolbar to zoom, search, print or save it.

The blue line below is a real link. Click it : the viewer stays on
this document and your application receives ue_link_clicked.

https://pbtoolboxai.net/

Pages and zoom

ii_page opens the document on a given page, counted from 1.
ii_zoom sets the zoom in percent ; is_fit fits the page, its width
or its height instead.

Set them BEFORE is_source : the document then loads only once.

Page three

You are on page 3 : the demo asked for it with ii_page = 3.

Changing a page, a zoom or a fit reloads the document : the reader built into the web engine only reads them when a document loads.

Specimen written for the PBToolboxAI demonstration. Free to copy and reuse.

The end

of_refresh reads the file again : the way to show a PDF that your application regenerated at the same path.

of_print opens the print preview of this document.
